Benefits

- Produced by specialist hydrologists with over 15 years' experience
- Our consultants have built a great working relationship with Environment Agency and Local Authority Officers across the UK
- Reports are widely accepted in support of planning applications and insurance
- Fixed price, great quality and fast delivery
- Fast track turnaround options available

Why choose FloodSmart?

We provide a range of assessment levels based upon the location of the site, which flood zone the site is in, the nature of the development proposal, and the complexity of the flood risks involved.

Our reports provide clear and pragmatic advice regarding the nature and potential significance of flood hazards which may be present.

Our consultants assess available data to determine the level of risk based on professional judgement and years of experience.

They are the most cost effective way for you to meet local authority planning conditions and understand the potential flood risk to a site.

To discuss how FloodSmart can help you manage risks to your property assets or business operations, contact us today.

About us

We deliver insight on environmental risk and suitability for property development and infrastructure. Our innovative range of desktop reports, data and services, built on a rich heritage of environmental science, enable smarter, more informed decisions.
